## Introduction

The Multiroom shelving system is a Danish design, designed by the Danish architect, Mr Anders Nørgaard „MMA“, and manufactured in Denmark. Multiroom is the flexible bookcase that stores books, decoration articles, etc. It can be wall mounted or stand on a plinth, just as the single module can be mounted vertically or horizontally. By staggering the modules, you get a „book end“ effect as the books can lean against the shelf on the opposite module. Multiroom can be used in the living room, hallway, children’s room, office, etc. The Multiroom plate items are applied with „grundia“ foil and 4 layers of lacquer that ensure a high wearability. You find additional information in the relating price list.

## Indledning

Multiroom reolen er dansk design, designet af den danske arkitekt Anders Nørgaard MAA, og produceret i Danmark. Multiroom reolen er den fleksible reol, der opbevarer bøger, pyntegenstande m.m. og som kan hænges eller stå på sokkel, og enkelt modulet kan både hænges lodret og vandret. Ved forskydning af modulerne opstår en „bogstøtte“ effekt, idet bøger kan støtte mod modsat moduls hylde. Multiroom reolen kan anvendes i stue, entré, børneværelse, kontor m.m. Multiroom pladeemner er pålagt grundia folie og 4 lag lak, som sikrer stor slidstyrke. Yderligere informationer kan findes i den tilhørende prisliste.
